Over 40,000 of our boys and girls

have got a chance to study, communicate, and finally live through splendid moments of childhood ❤️

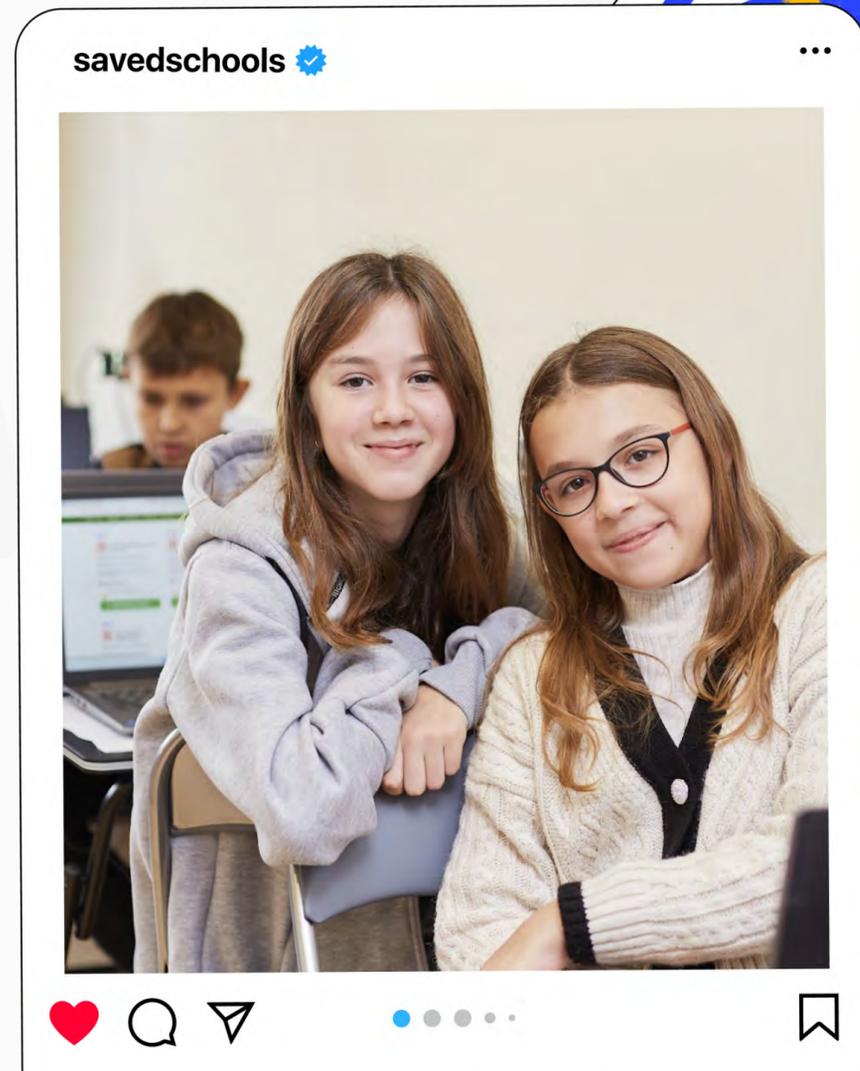

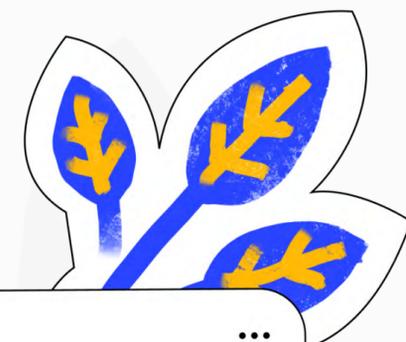

2023 has become a year of new regions for us – we “discovered” Mykolayiv, Kharkiv, Dnipropetrovsk Regions, so dear to our hearts already. There as well as in Kyiv and Chernihiv Regions we are working mainly in small communities, where nothing remained of the schools. But children are there, so the savED team is there. Somebody may not be impressed with the figure of 40,000 children who returned to school.

But for our foundation this is a story about 40,000 boys and girls whose eyes are again shining because of such simple children’s joys as offline lessons with beloved teachers and socials with classmates during the breaks.

Education and Science
of Ukraine

In the summer of 2023, we celebrated the anniversary of the Foundation activity. Then we counted up that the Foundation managed to help 54 schools. This number was tripled by our team together with the partners by the end of the year. Somewhere a complex solution as development of a big shelter or an educational center, somewhere enhancement with equipment. And somewhere – a support for local teenagers to launch supercool projects like those of UActive Civic Education Program participants.

Solutions are different but are commonly aimed: savED helps create better conditions for learning, and sometimes the only chance for education in the community. Everything we are doing means, first of all, the faith, and that even small communities are not forgotten, and that there are people who care.

150 – this is the number of Ukrainian schools we are helping

Together we are restoring the institutions both “hard” and “soft” – everything to return the right to education and socialization to children there.

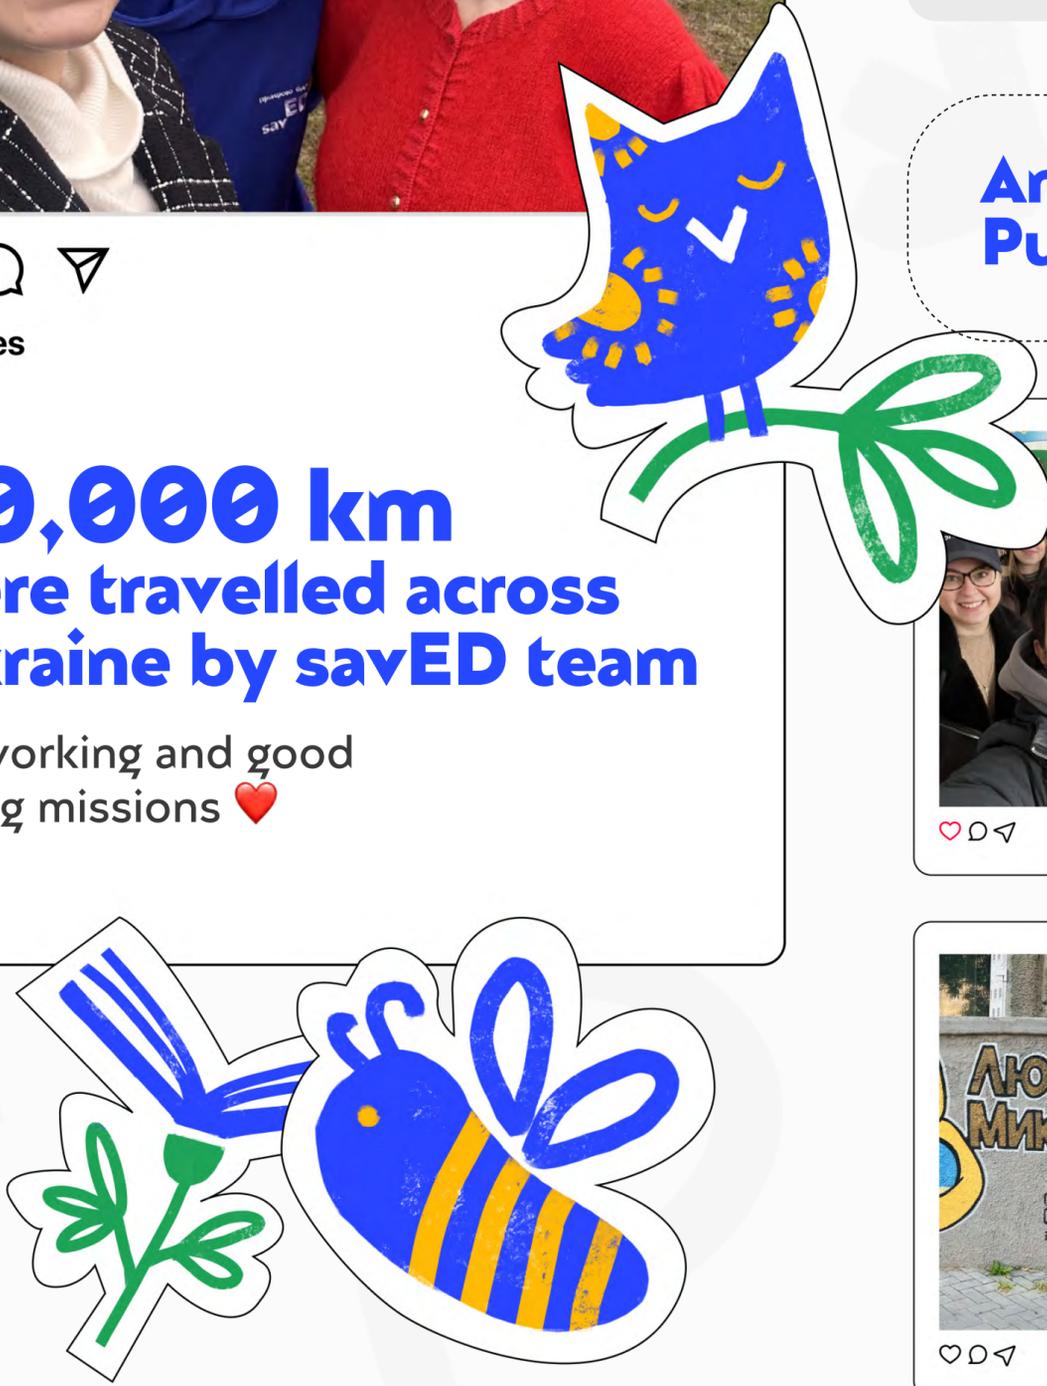

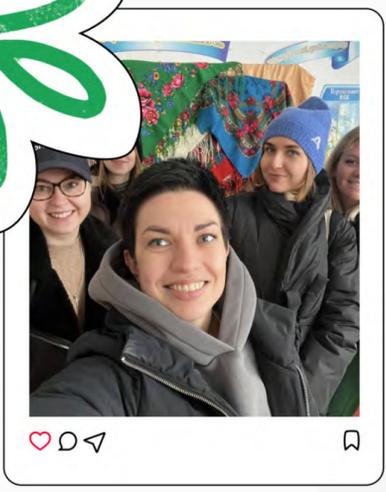

To develop shelters, to create dozens of educational centers, to establish temporary schools in the undamaged buildings of Cultural Centers, to select schools for UActive teenager program participation – all this can't be managed staying in Kyiv.

Thus, trips to the communities and communication with local enthusiastic partners are an integral part of life and favorite work routine of the savED team.

Returning children to school

We raised \$ 5 500 000

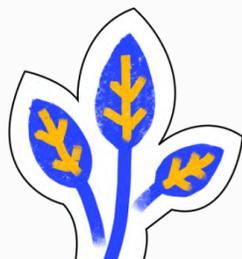

to restore access
to education ❤️

Accounts and payments

\$ 4 600 000 From international organizations

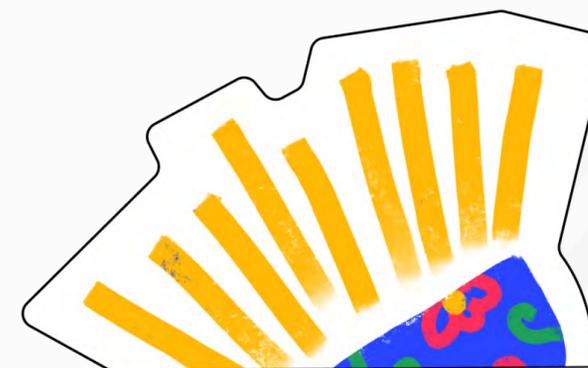

Thanks to the support of international organizations and partners we have managed to create dozens of educational centers, develop shelters and temporary schools for thousands of Ukrainian boys and girls.

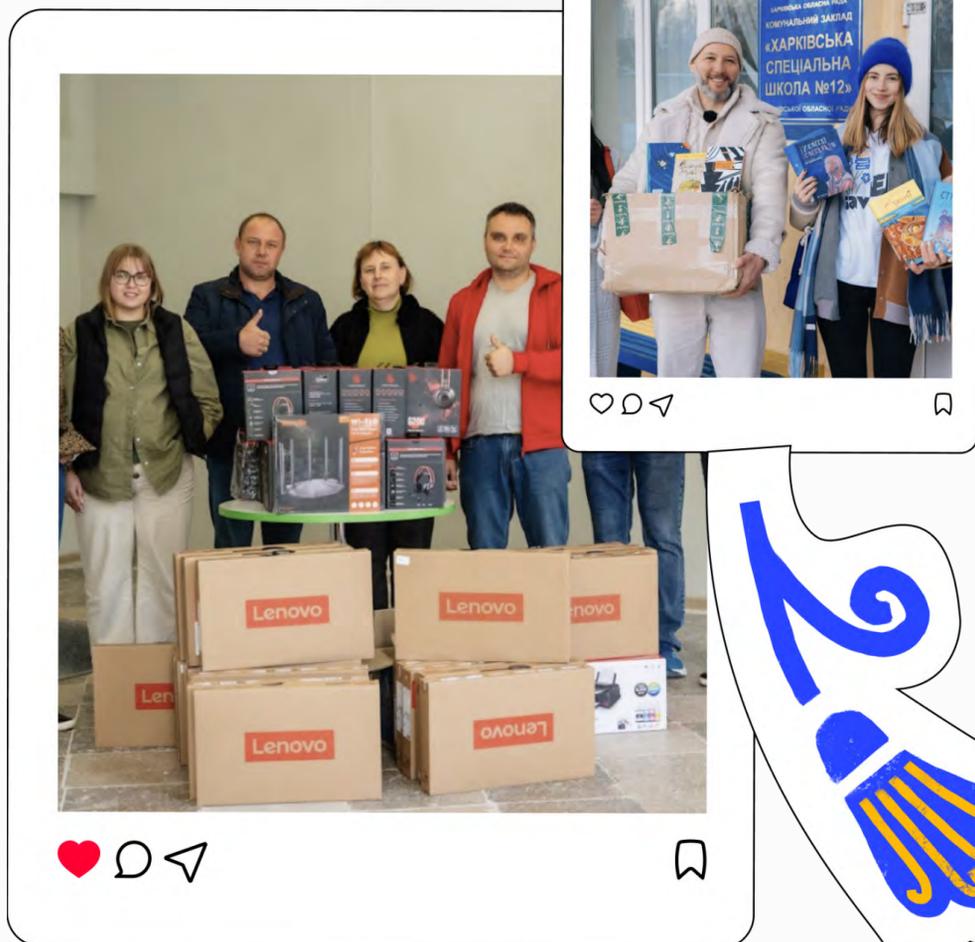

And we are particularly pleased that our partners share our wish to help the communities that have substantially suffered from war and lack support.

**Anastasiya
Klimina**

Operations Director
of ICF savED

Sasha Shevchenko

Head of savED Business Partnership Department

We are aware that Ukrainians and responsible Ukrainian businesses are donating today for the army. However, the feedback we received this year for our Back To School campaign has proved once again: education is on time. And one more – that Ukrainians, despite all challenges, are thinking of supporting our children! Thanks to this we have enlisted support of Ukrainian businesses and have been active in creating the opportunities for our schoolboys and schoolgirls.

Publishing houses and bookshops, banks and payment systems, IT and fashion companies, confectionaries and fast-food networks – our partners are different but united in their purpose: to collect funds for Ukrainian education restoration!

\$ 900 000 donated

from our people and business ❤️

#Back to School

The fundraising campaign in response to the initiative of Ministry of Education

Collecting funds for shelters and educational spaces so that children could return to offline education

[Support us](#)

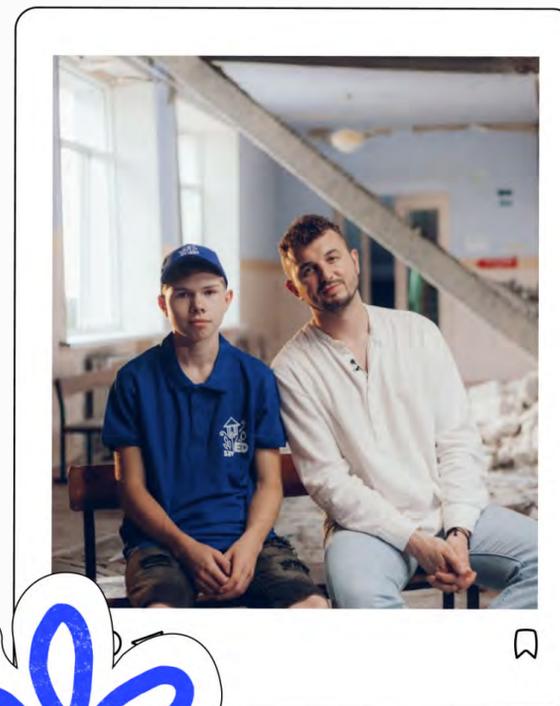

Back to School! – the appeal our fundraising campaign was started with in the summer of 2023. And then everything was moving forward like in a (fairy 🧚) fog: information partnerships, participation in top shows, cooperation with influencers, outdoor advertising, video campaign at the biggest national screen...

And more importantly – support of the best partners who made the education theme sound loud, and collections closed fast.

back_to_school 

\$ 40 000

for the shelter in Snihurivka was raised by Zhenia Yanovych who produced a special episode of his 20:23 Youtube show about the Snihurivka Lyceum

Українська Правда and the international charity fund savED announce the closing of the collection for shelter for Lyceum No. 55 in front-line Mykolaiv as part of the "To school again" campaign.

With our joint efforts, we managed to collect **4 million hryvnias** for the major repair of the school's basement as a bomb shelter.

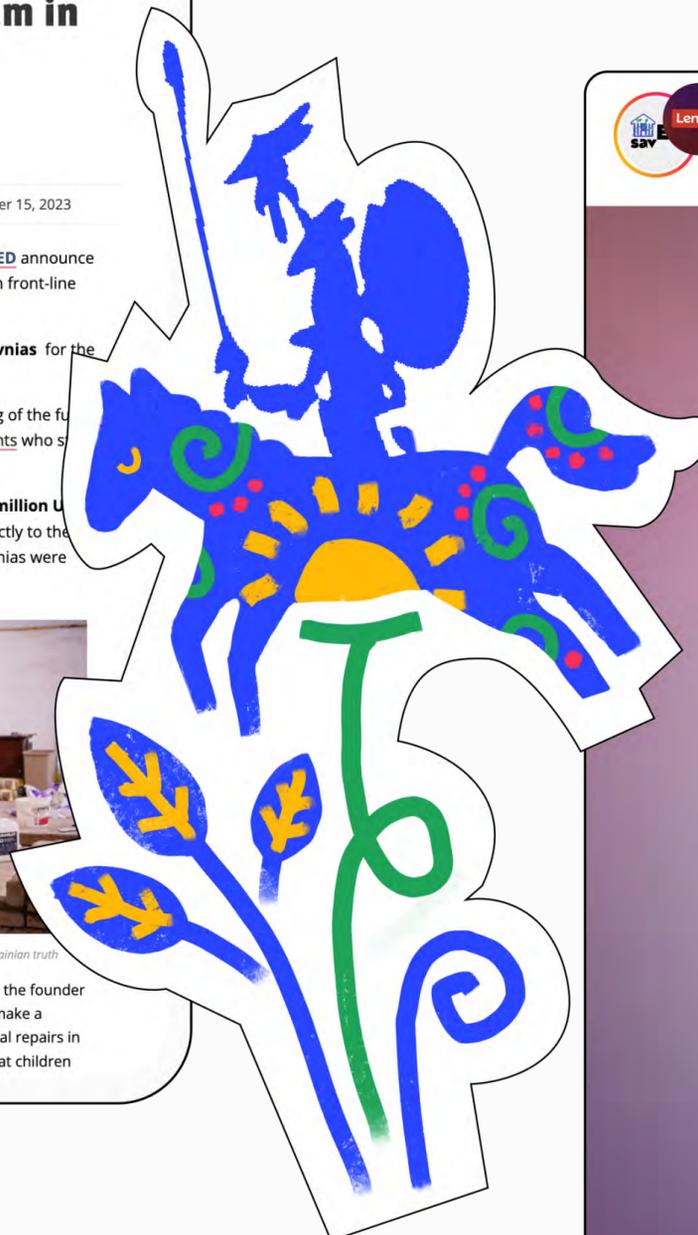

We told how the lyceum has been living since the beginning of the full-scale invasion of the Russian Federation, introduced students who stayed there, acted out pictures and met with our journalists.

Thanks to thousands of contributions from our readers, **2 million U** were collected! **A benefactor sent another 2 million** directly to the account of the savED fund. In addition, 400 thousand hryvnias were donated by the investment company Dragon Capital.

Educational Centers, or EduHives

In 2023

our digital educational centers were re-branded and were called "EduHives"!

20:23 📶 🔋

< **dlc_project_ukraine**   

 **50** Posts **2,300** Followers **10** Following

Educational Centers, or EduHives 

"EduHives" is an education emergency aid for the communities affected by war.

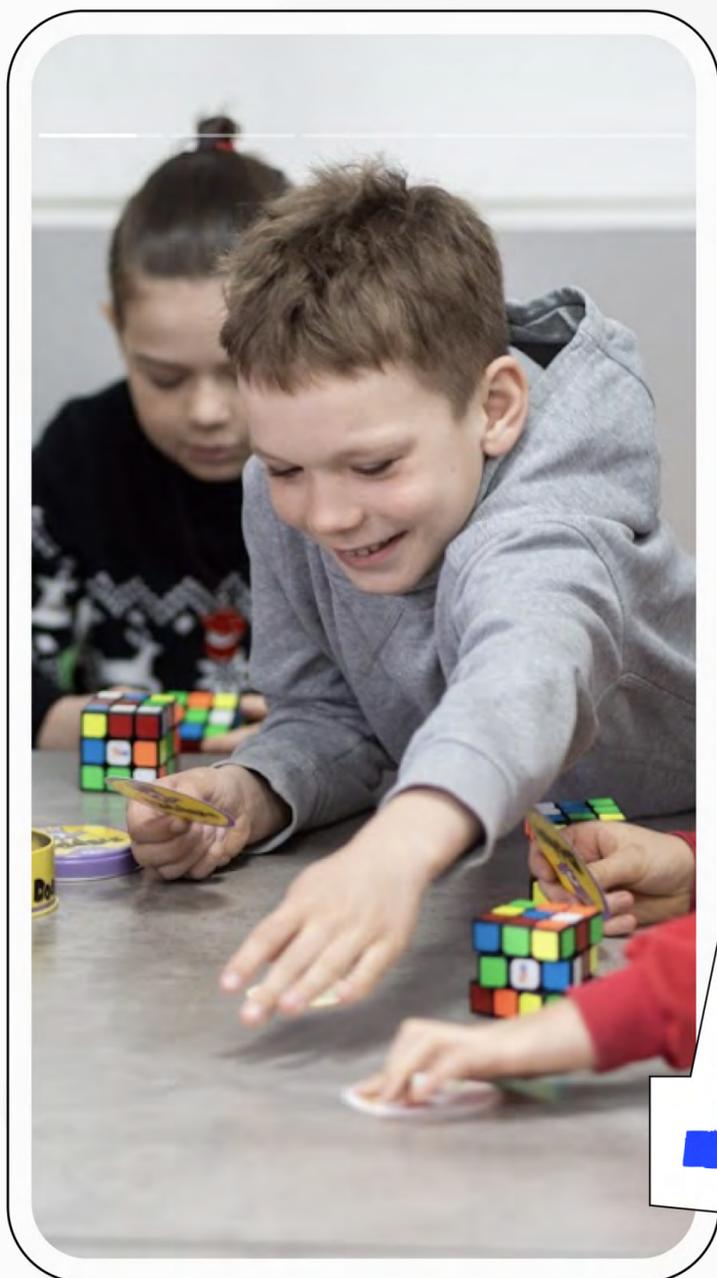

[Support us](#)

savED team creates spaces filled with everything necessary for education: colorful books, table games, gadgets. And "EduHive" tutors help little visitors catch up on the curriculum and join interesting extracurricular events.

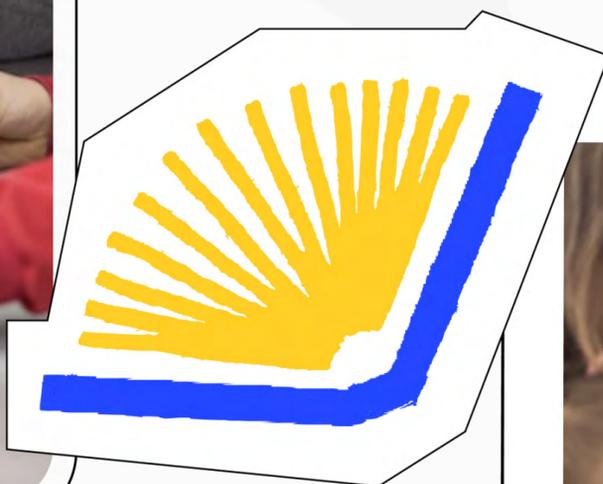

In 2023 savED:

launched 48 educational centers.
Totally for the 1,5 year – 64

We are developing “EduHives” in schools, shelters, even in the undamaged cultural centers and hospitals.

Our purpose is to restore access to education, despite everything, where the children lost it due to the war. And if the only option is to have an educational center in the ambulant clinic – it is there where our “EduHives” will accommodate, begin to buzz, and invite local boys and girls to come!

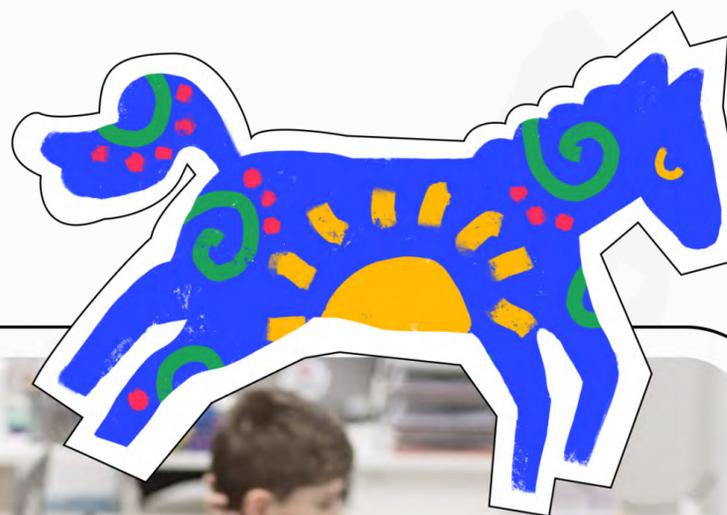

And were act-act-actively spreading across Ukraine.

Now our spaces have been functioning in five regions of the country! Today “EduHives” for children, teenagers, and youth may be found in Kyiv, Chernihiv, Mykolayiv, Kharkiv, and Dnipropetrovsk regions.

Educational Centers, or EduHives

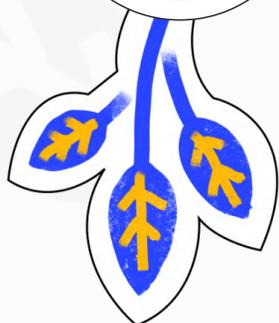

PISA study held in Ukraine in 2022 demonstrated: children from villages are 5 years behind the children living in the cities. And these data do not consider the full-scale invasion effects! That is why we are opening educational centers mainly in small communities.

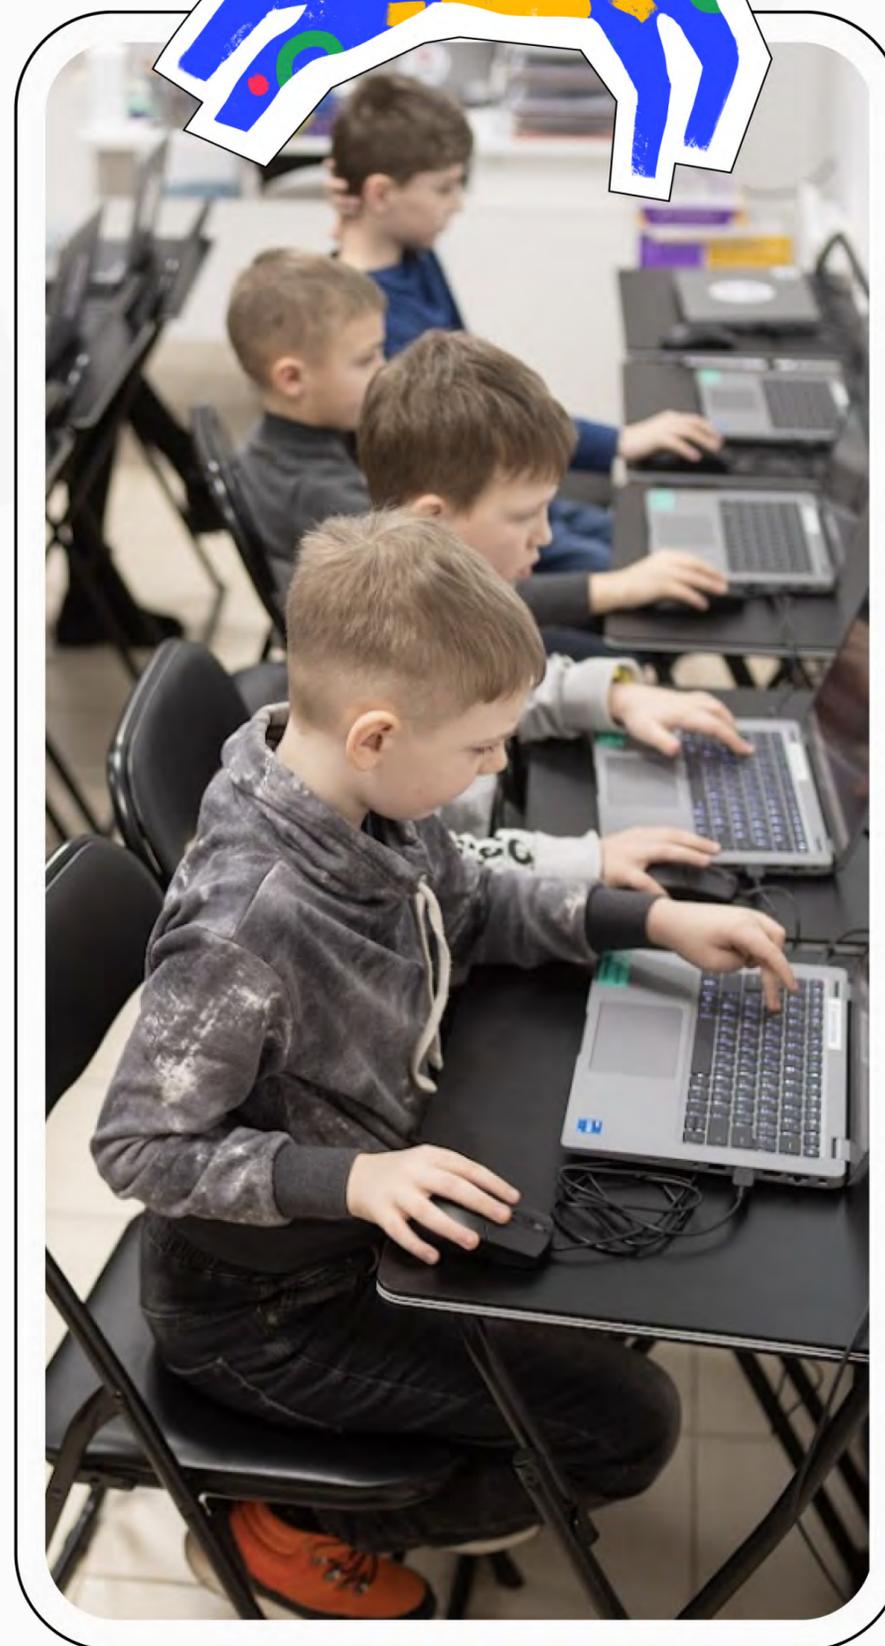

Attracting qualified tutors, additional classes and consultations, collaboration with educational platforms and services – we are daily and enthusiastically filling “EduHives” with senses and contents!

30+ shelters in schools of

 KYIV REGION

 CHERNIHIV REG...

 KHARKIV REG...

 MYKOLAIV REG...

“Underground School” in Snihurivka

Snihurivka is a Mykolayiv Region city that lived through the occupation horrors. There is only one undamaged school here – and this is the only chance for children to return to offline education. But for this purpose, it needs a shelter that we have started developing. This is a huge space that we plan to transform into a full-value “underground school”.

Shelter in Mykolayiv Lyceum No.55

At the end of summer, we raised 8 million hryvnias for a huge shelter in Mykolaiv Lyceum No. 55. By equipping it, we will give 3,000 children the opportunity to study offline.

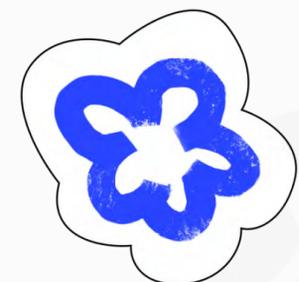

Shelter in Lyceum No.54 and the O.Olzhych Lyceum, city of Mykolayiv

In the autumn we completed and equipped two shelters developed with Plan International support. We are confident: soon these cozy spaces will help children return to safe offline education!

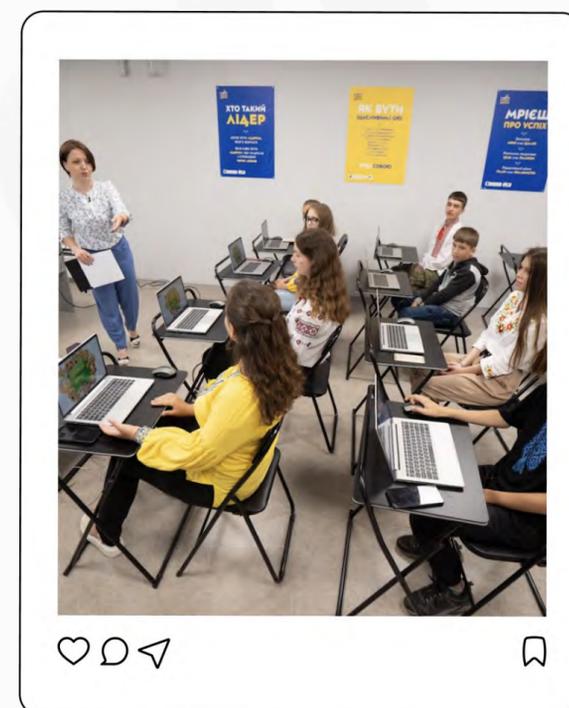

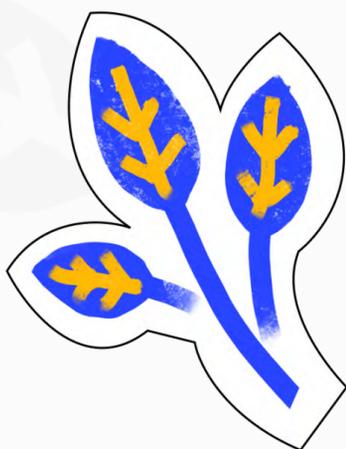

Shelter and educational center in Horodnia

Over a year the children in borderline Horodnia, Chernihiv Region, were not able to study offline. A new "EduHive" developed by us together with partners from AWO International is a chance for local boys and girls to return to classes and communicate face-to-face.

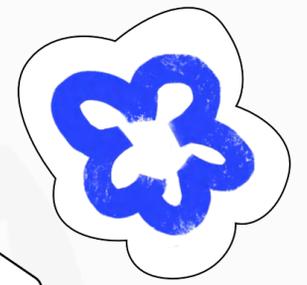

Shelter and educational center in Andriyivka

A damaged school in Andriyivka, Kyiv Region, has become an educational hub for the children of the village and nearby Makariv. And this happened thanks to the "EduHive" developed by us with our partners from Crown Agents.

Temporary schools

We are turbo fast in helping the communities where the schools are destroyed.

Launching the educational process not waiting for a big renovation of Ukrainian schools

[Support us](#)

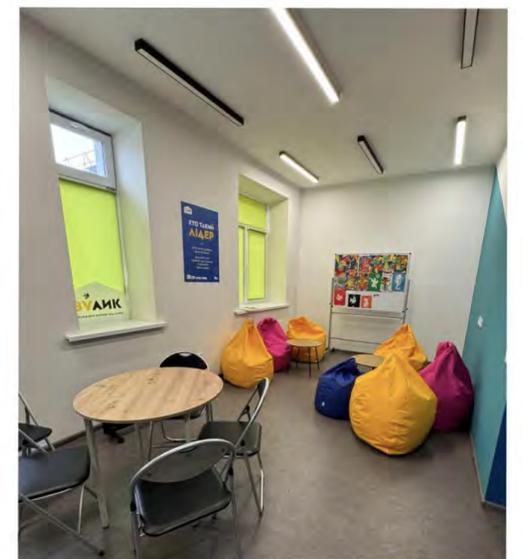

Transforming local abandoned houses of culture or other civil buildings into educational spaces

saved_temp_school

Educational space for children in the ambulance clinic in Pervomayske

The only undamaged building in the village is an ambulance? OooK, the school will be developed there! In fact, it has been developed already with a support of brilliant partners, Crown Agents :)

View all 16 comments

 **CHERVONA DOLYNA**

Temporary school in the house of culture of Chervona Dolyna.
Chervona Dolyna is another village in the Mykolayiv Region that savED team is caring for.

154 local children will get access to education

Together with U-Lead with Europe, we have developed a temporary school and the EduHive educational center in their house of culture.

UActive
Supporting Ukrainian boys and girls in launching socially important projects

Civic Education Program for Teenagers.
Assisting teenagers to become leaders of changes.

[Support us](#)

Curiosity.
Strive to understand new things.

Creativity.
Dream turbulently, act bravely.

Kind-heartedness.
Hear yourself and others.

Community.
Be different waves of the same force.

Ukraine.
Create the future at home.

37 schools

570 participants

Khrystyna Kaschuk UActive program coordinator

Today's high school students are the generation that will rebuild and develop Ukraine during and after the war.

We are assisting these boys and girls to develop their communities, create cool spaces for themselves and compatriots, implement environmental projects, develop labs and techno hubs in native schools. And the most important: we are inspiring them to dream turbulently and act bravely!

50 teachers

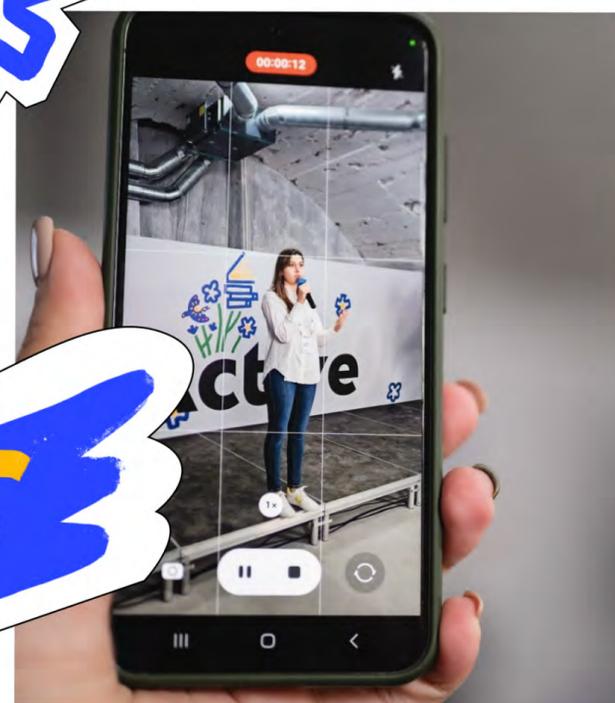

25 mentors

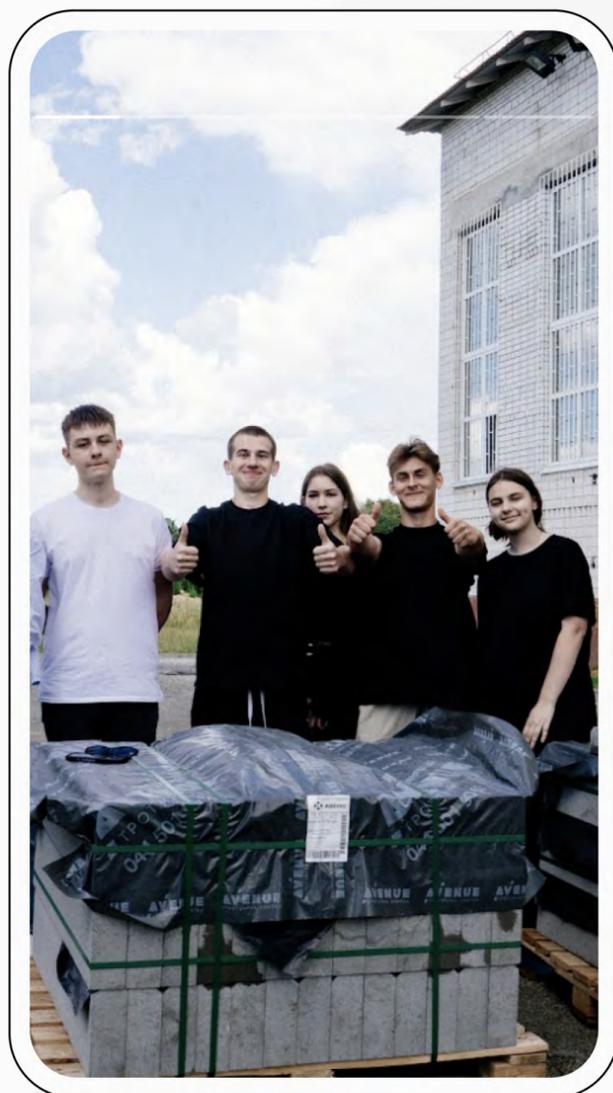

18 projects were granted funds

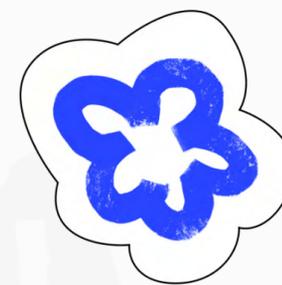

10 projects have been implemented

Projects of UActive participants

Sports ground in Borodianka

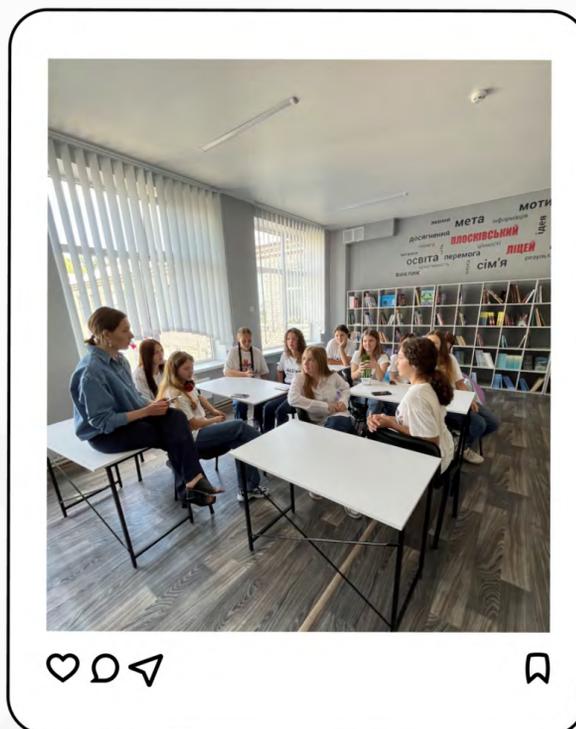

For the implementation of the project of the Borodianka Lyceum students the funds were raised literally by “all together”. In addition to the USD 5,000 grant won at UActive, the students attracted another USD 2,000 from patrons. And at the educational festival in Lviv, !FESTrepublic and the Fund of Free and Caring raised another UAH 45,000 for Borodianka.

Our partners from the Reimagine Ukraine Foundation (USD 3,400) and Mariya Holota (UAH 100,000) “fixed up” with money from charity races. Together with TSVITE TEREN, we raised UAH 35,000 by drawing off customized jewelry, and the collection was finally closed by our incredible partners, TECHNO YIZHAK Company, who donated almost UAH 120,000 from the sale of equipment.

Co-working in Ploske

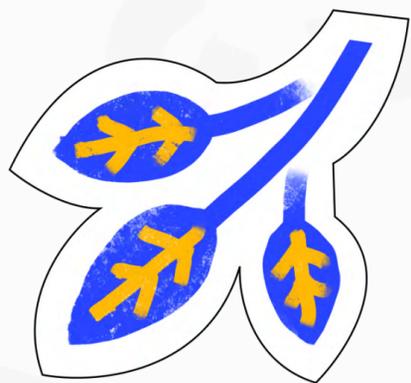

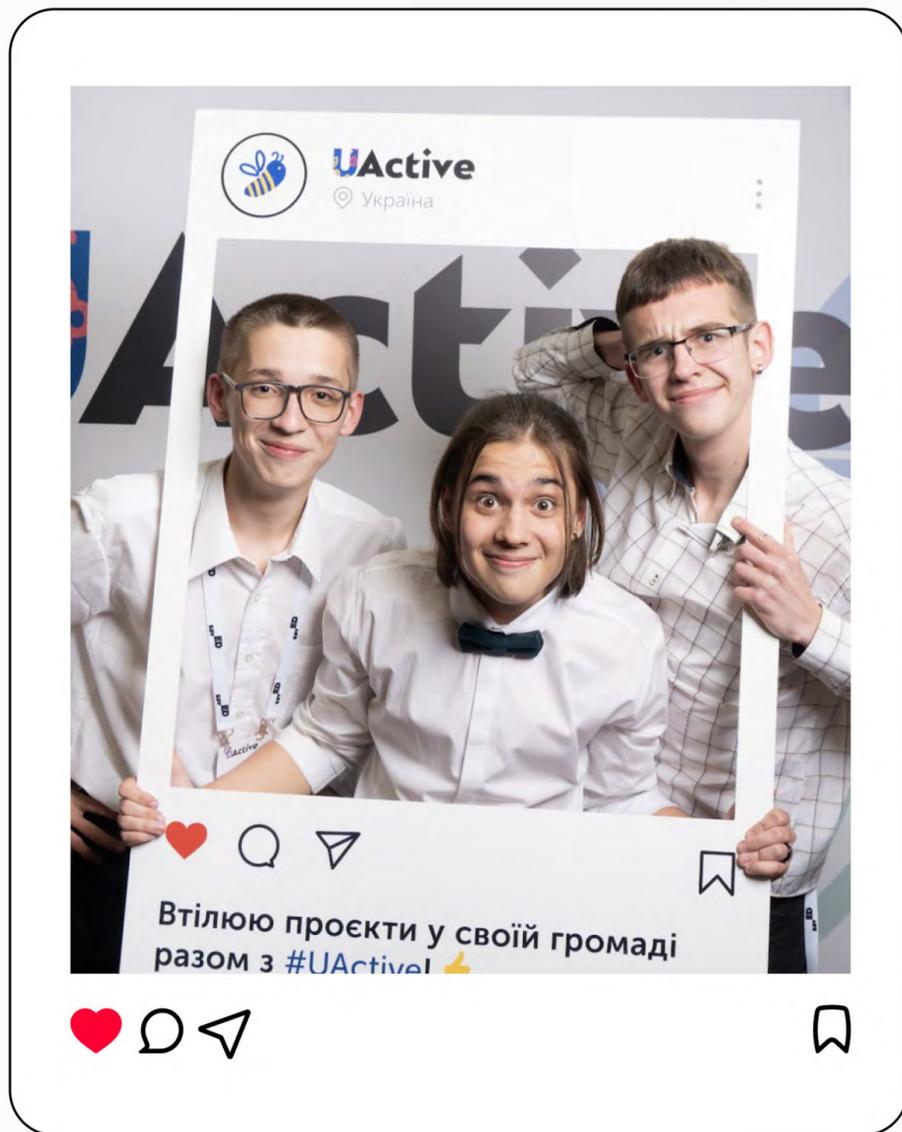

To transform an old school library into a student co-working? – Easily! Powerpuff Girls team won a USD 5,000 grant and developed a mega space in the school.

Projects of UActive participants

STEM-laboratory in Katiuzhanka

“Spokesmen of the Future” did not convince the jury at the pitching but did not give up and “sold” their project to the Lviv IT cluster. Now, plastic is being recycled, and parts for drones on 3D printers are being printed in the school where the “kadyrov’s men” were quartered.

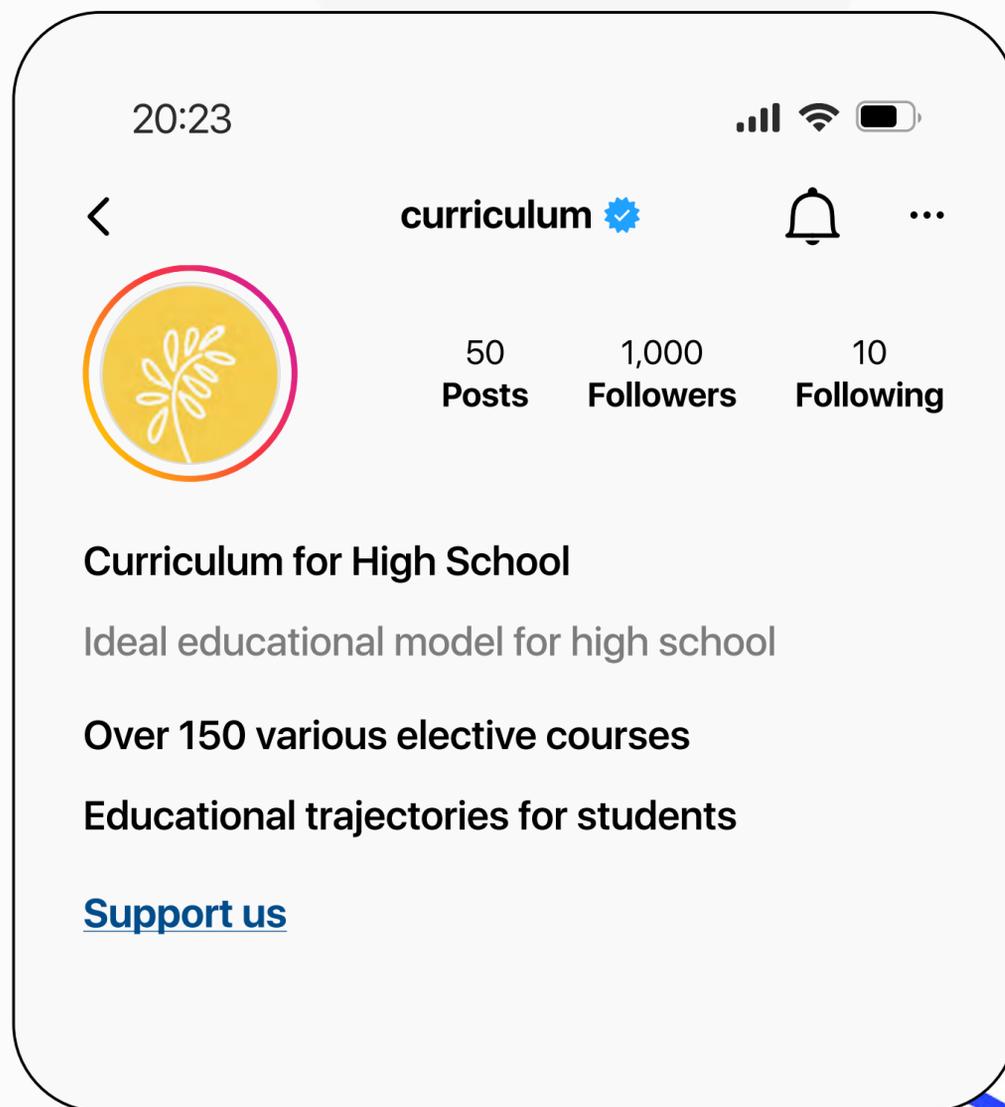

Ecoproject in Chernihiv

Plastic – to help homeless animals. Chernihiv teenagers installed an eco machine to collect bottles, and the money received is donated for the animals’ shelter.

Curriculum for High School 🥰

We have developed a concept, a strategy and a curriculum

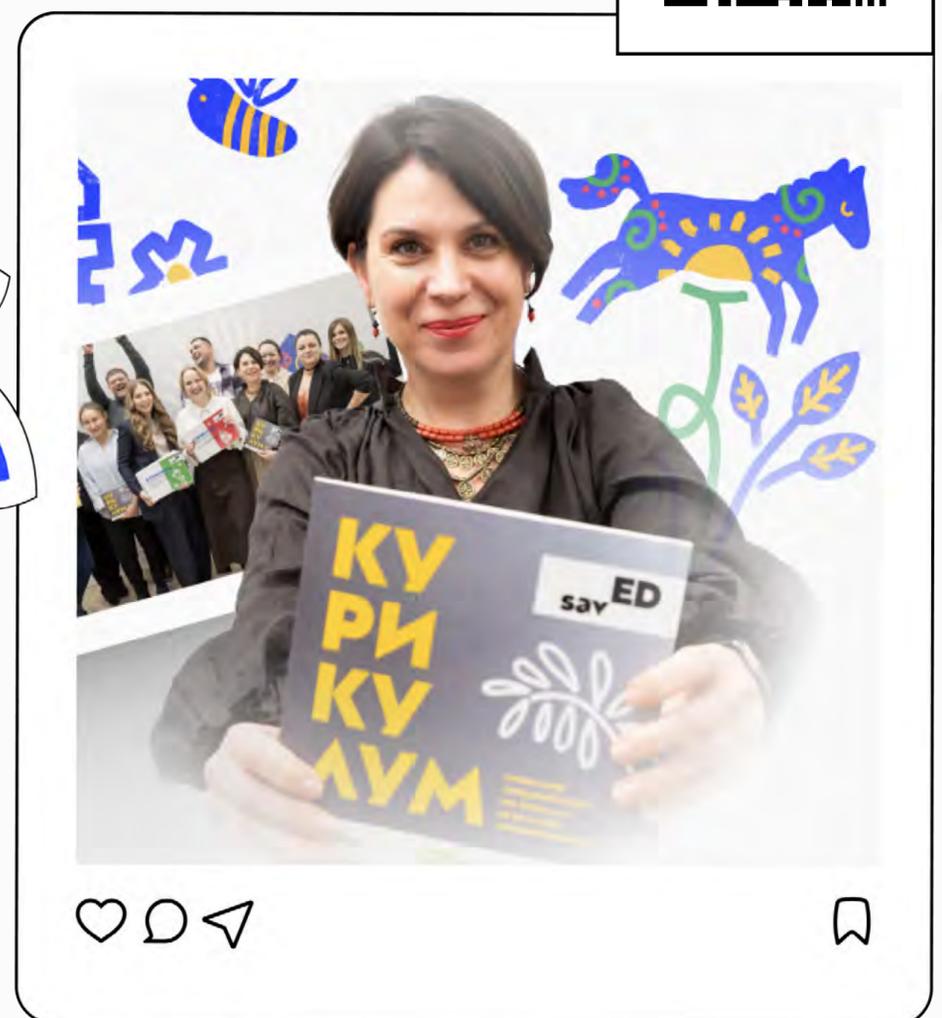

for the high school based on the Zhytomyr Lyceum example. This was done shoulder to shoulder with our partners, driven with changes: Zhytomyr City Council, Junior Academy of Sciences of Ukraine, and Finn Church Aid!

[Download curriculum](#)

Four educational trajectories (pathways) in the Lyceum:

- ♦ Liberal Arts
- ♦ Medicine, Biotechnologies, Environmental Studies
- ♦ Information Technologies
- ♦ Engineering, Design, Materials Science

Lyceum Specific Features:

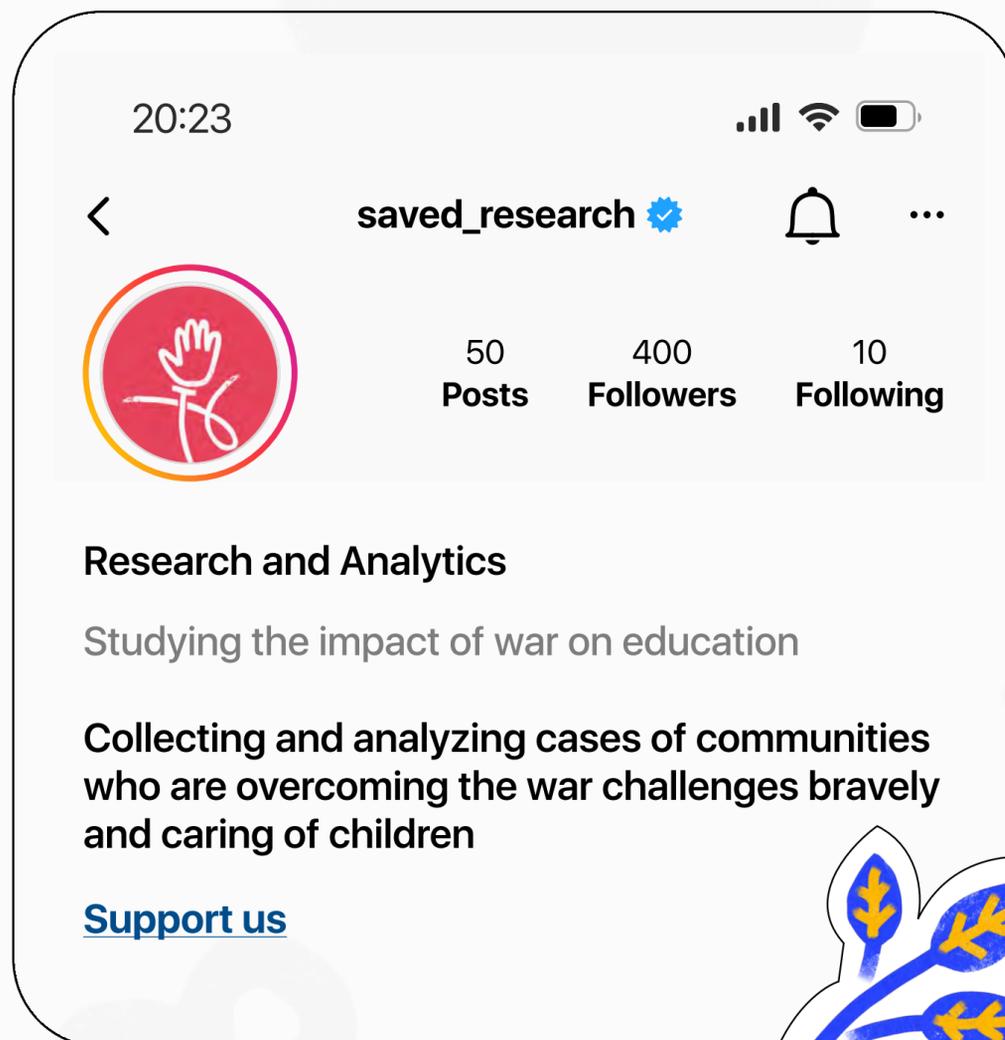

- ♦ Majors instead of grades
- ♦ Focus on project work and research
- ♦ A wise choice of courses / studios/ groups of interests
- ♦ Career Guidance program
- ♦ Soft skills development system
- ♦ A lot of attention to sports
- ♦ Volunteering and job training

Lyceum highlights

- ♦ Option of individual schedule
- ♦ Off-loading: students study 10-12 subjects instead of 22
- ♦ Solid career guidance aspect
- ♦ Environment where a child is respected, and creativity for changes is promoted

Research and Analytics

It is important to restore schools, both the infrastructure, and content. 

And this is why our team is assessing and advocating the needs of Ukrainian schools. Together with partners, we are studying the pains of educators and thinking creatively how to overcome these challenges.

How schools are working in wartime,

what challenges they are facing, what help and support they need, and – the more important – how students and teachers feel and how they could be helped in this tough time – we are seeking answers for these sensitive questions in our annual studies.

War & Education. How the year of full-scale invasion affected Ukrainian schools

11% of schools – this is the share of Ukrainian schools destroyed by the enemy for the first war year. Parents of Ukrainian boys and girls are sure: learning losses due to the war will have an impact on the future of their children.

[Results of our first study](#)

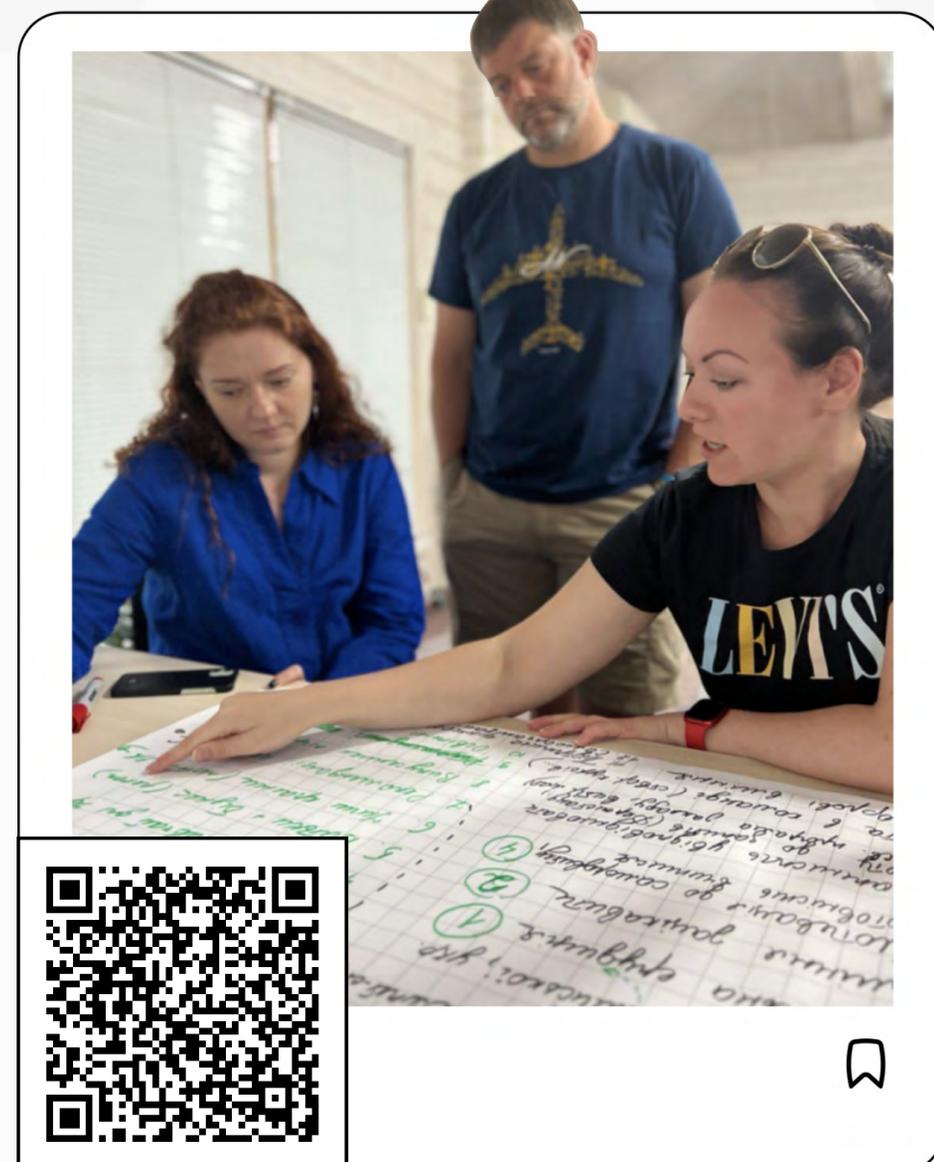

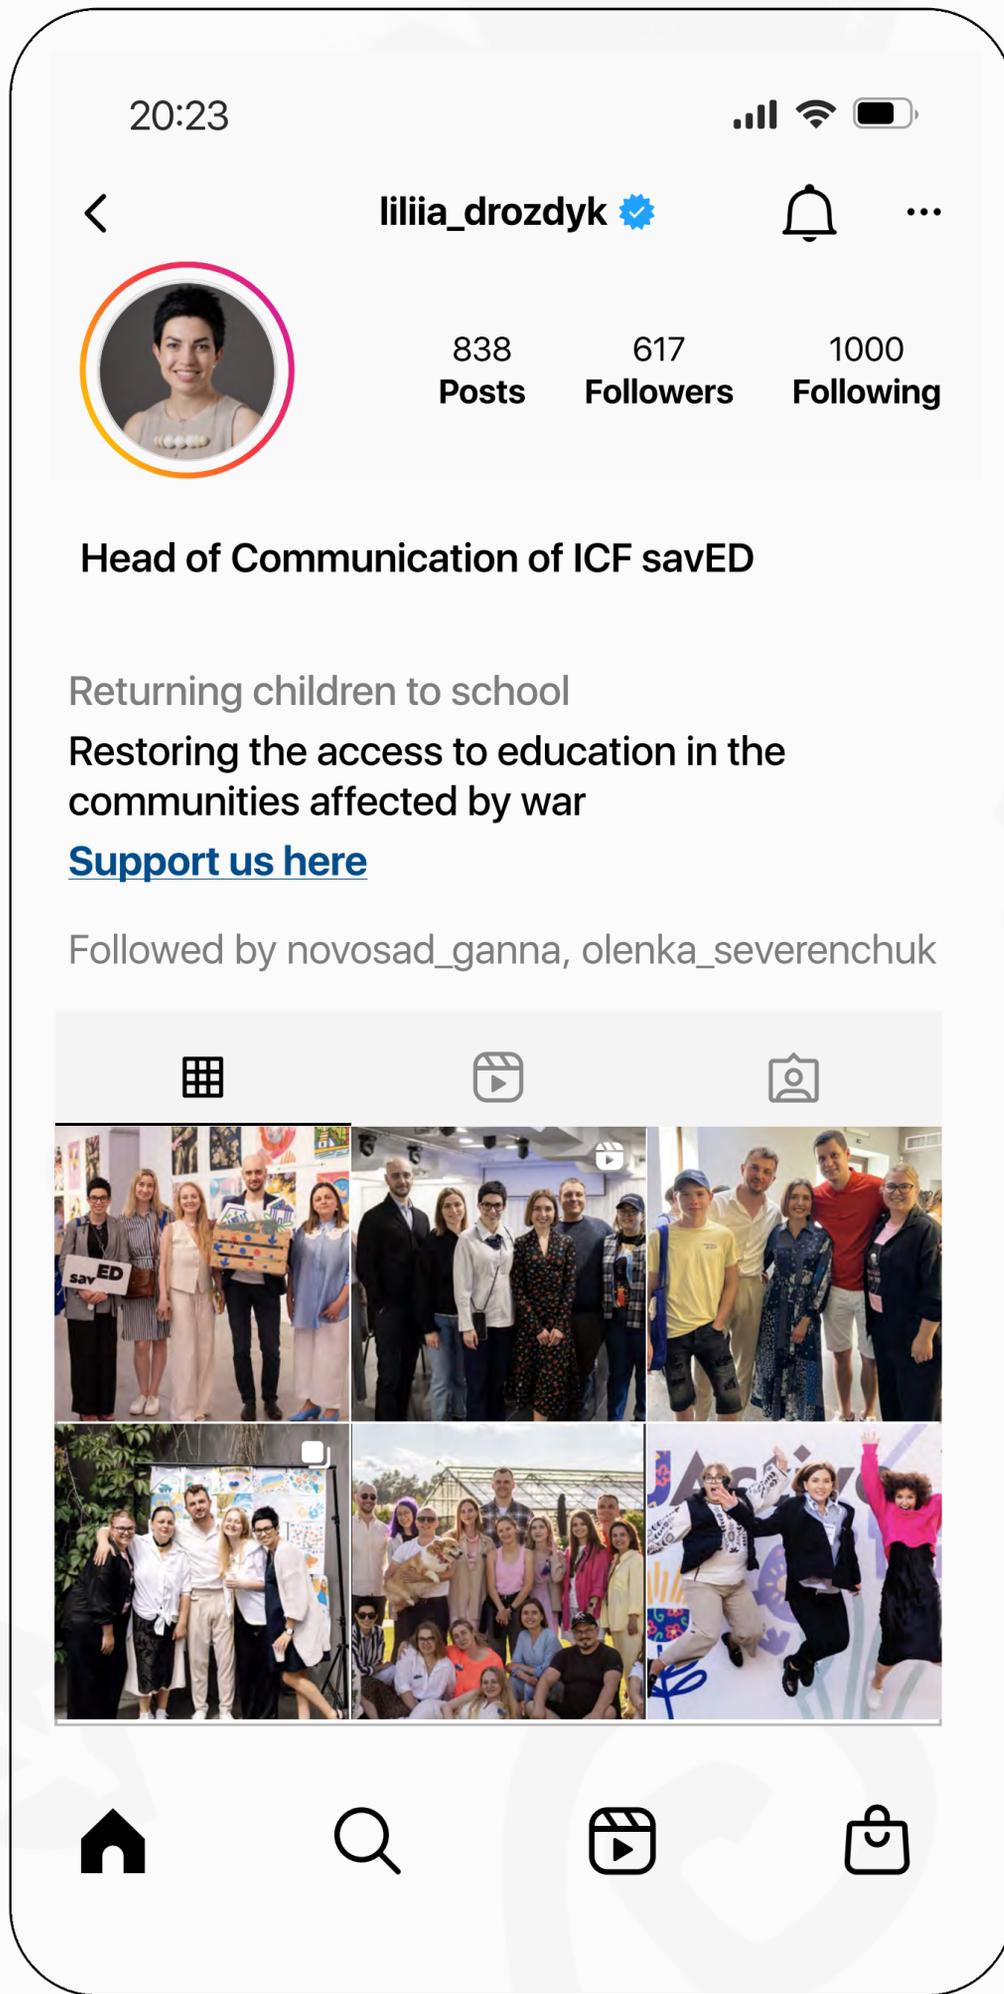

War & Education. Two years of full-scale invasion

And what is with education? A few spoilers from our study for your attention:

- 📍 One fourth of high school students wants to move abroad after finishing the school
- 📍 Parents rate the emotional state of their children higher than it is in fact.

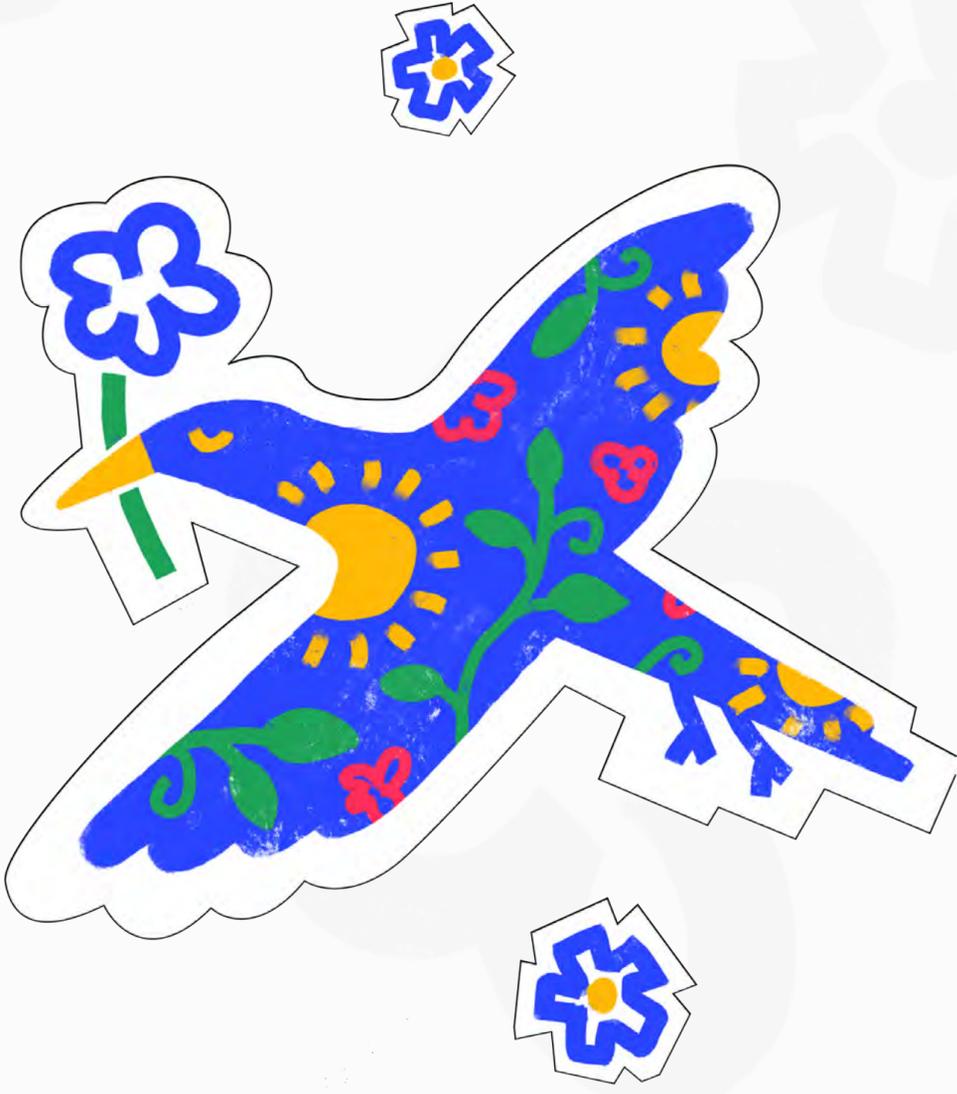

[The study results](#)

Good should sound loud. From YouTube, Facebook and Instagram, from billboards and city lights, from the “telemarathon” screens and the biggest screen of Ukraine in the center of the capital.

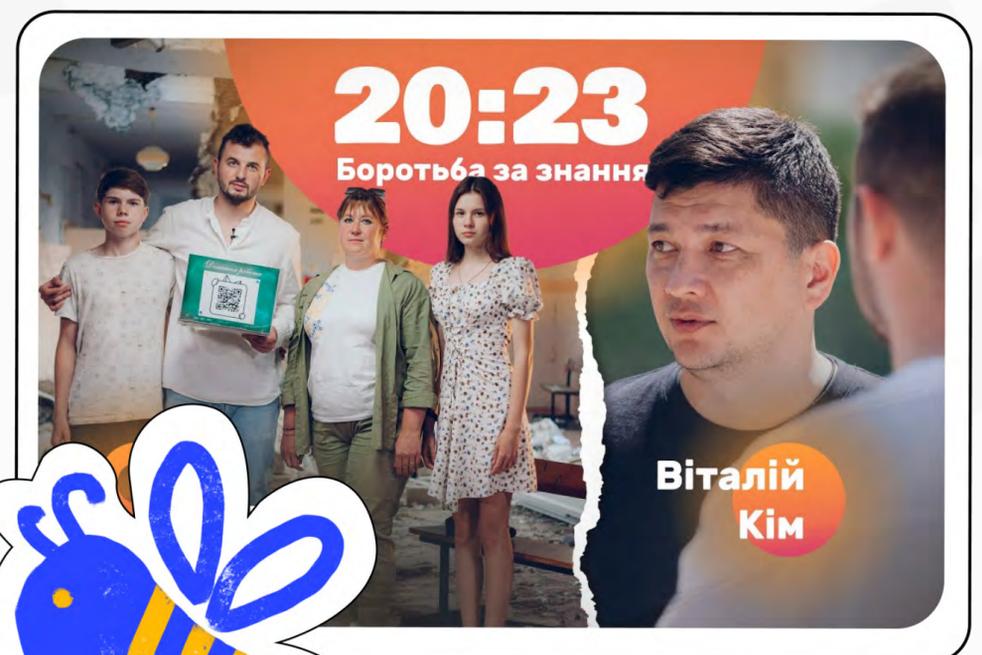

Everything for schools to be restored, shelters to be developed, and for children to be able to return to the safe and dreamy education. And also – to socialization: communication with classmates and being naughty during the breaks.

Schools are a place for studies, not for ruins 🇺🇦

Each 10th education institution in Ukraine is destroyed or damaged. Only for March 2022, Russia destroyed 27 of 34 Chernihiv schools, including 2 that were razed.

Our video story is about students and graduates of these schools. This is a story of destroyed walls of classrooms but not of lost education. Story of ruined ceilings of gyms but of perpetual wish to study. Story of Ukrainian children: incredible, motivated, thirsty for knowledge, despite everything.

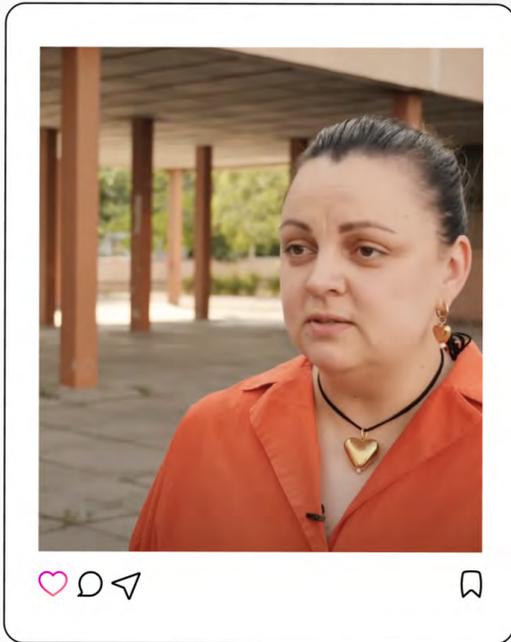

Who is this, what is he?

This is Yevhen Yanovych, leader of thoughts, owner of hearts (ours, for instance), author of 20:23 Youtube show, and ambassador of our Back to school campaign

In the special episode of 20:23 Yevhen told the story of the Snihurivka schools and Lyceum No.3. This is the only local school that was lucky to remain undamaged. Others were demolished by Russians who occupied Snihurivka as early as in March 2022.

After the episode release, Yevhen raised UAH 1.5mln for the shelter in the Snihurivka Lyceum for less than 48 hours. 🇺🇦

 **saveschools**
Returning children to school

I want to school –

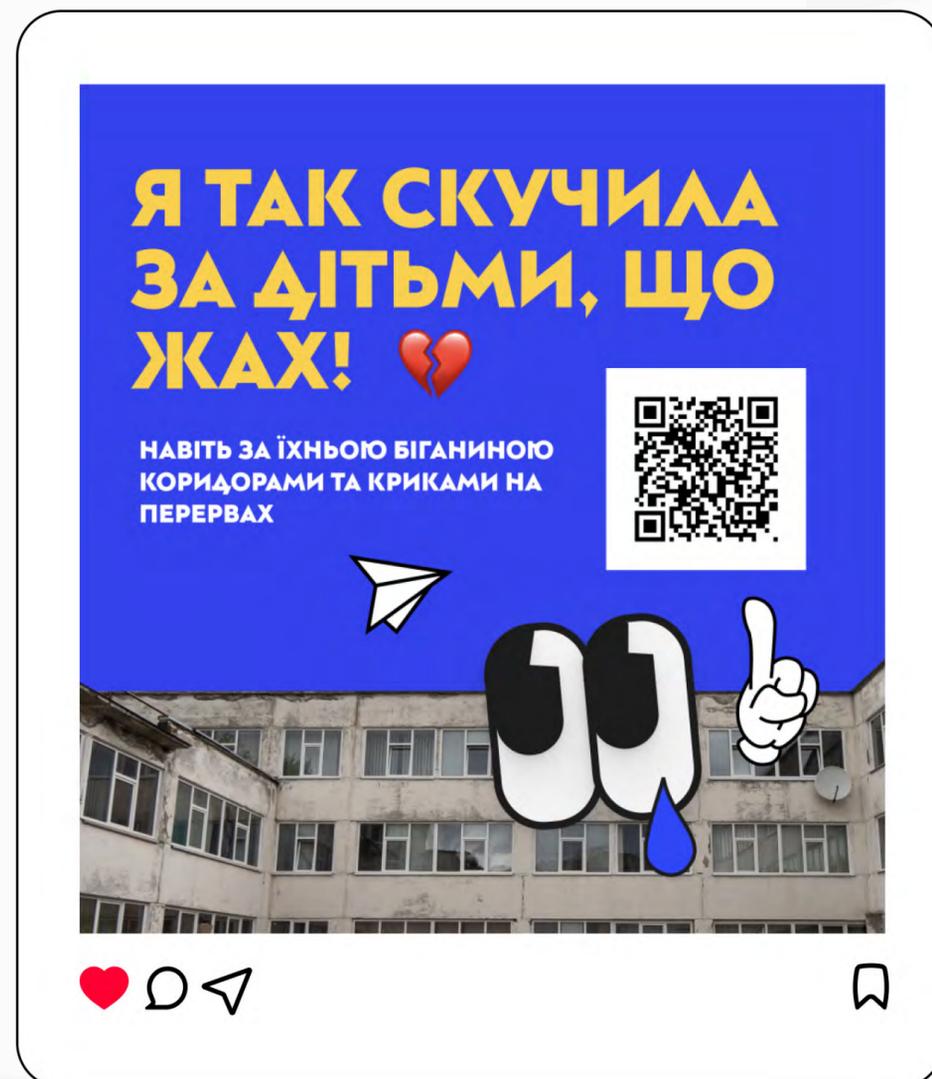

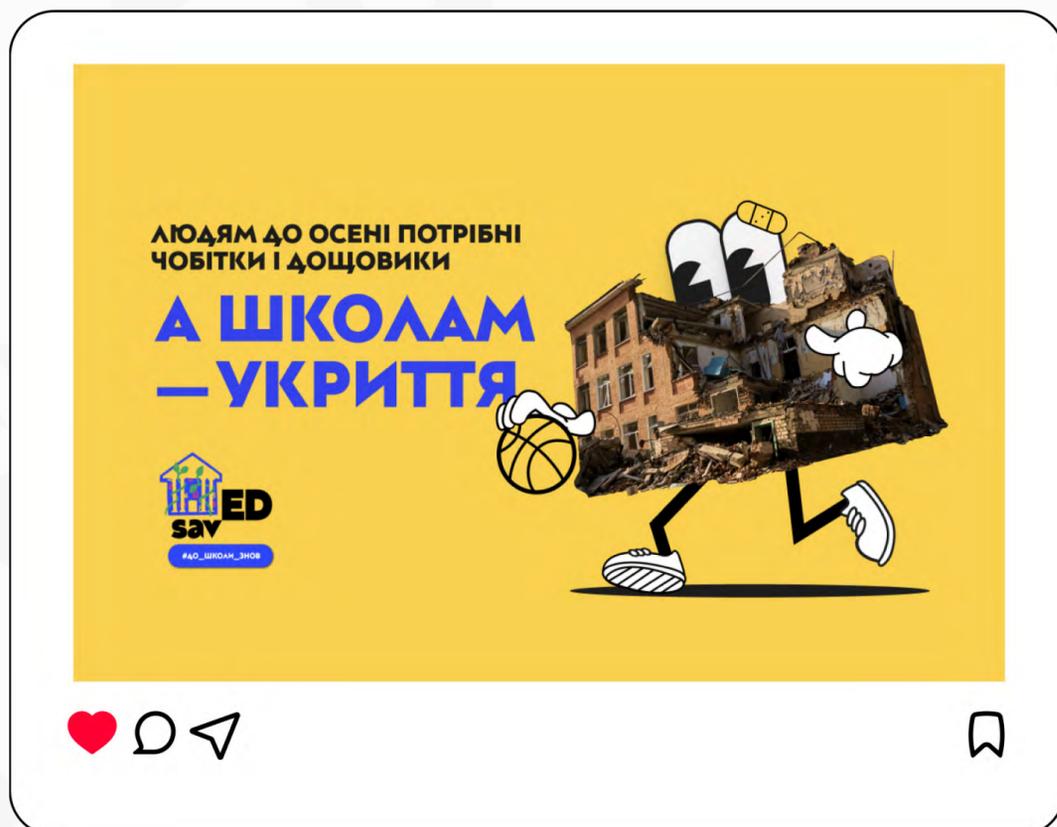

a journalistic story of UKRAYINSKA PRAVDA from Mykolayiv. From the city that we tenderly call "Myko". Together with UKRAYINSKA PRAVDA, we were raising money for a shelter in one of the biggest city schools.

We have decorated Lviv and Kyiv with our bee advertisements

The bright boards and city lights are reminding us now: education is always on time. And they also call to donate so that children could return to school again as soon as possible.

This is a short story about our 2023 year. It's been a year of remarkable achievements, made possible by the unwavering support of our partners, the dedication of our tireless team, and the generosity of individuals who contributed to the restoration of education. Yet, none of this would have been possible without the brave men and women of the Armed Forces of Ukraine. Thank you all for standing by our side ❤️

Yours savED
